## Website Hosting

Once your website is built you'll need a place to put it. More than that, though, you need your site to be available 24 hours a day, 7 days a week. You need your site to be quick and easy to get to.

Hosting companies are like landlords for websites — they provide high-speed connections to your website from the Internet, disk space to store your website on, domain name mapping, email, and more. Webmaster, Inc. offers high-quality hosting services at competitive rates.
